

EasyShoe One Mushroom Cuff - Frequently Asked Questions

Have a question that's not answered here? Please contact us for more information.

Q: How do I apply? How do I make sure the cuff lines up with the shoes?

A: You will apply the shoe + cuffs as you would our other Super Glue styled shoes. Be sure to snap the Mushroom Cuffs into the integrated cuffs on the EasyShoe One Glue BEFORE you glue. This ensures they will line up correctly. To apply, you can apply Super Glue inside the cuffs first, then slip the shoe on the hoof and wrap. Or, you can slip the shoe on the hoof and apply Super Glue while the horse stands on all 4 feet. Either application method will work well.

Q: How do I reset?

A: When it's time for a trim, you will need to remove the Mushroom Cuffs from the hoof wall prior to trimming the hooves. You can use hoof nippers to peel the Mushroom Cuffs off the hoof wall. Trim the hoof, prep the hoof for glue, and re-apply.

Q: Can I remove the shoe but leave the Mushroom Cuffs on the hoof wall?

A: While it is possible to remove the shoes without removing the Mushroom Cuffs, the Mushroom Cuffs are not designed specifically for daily application and removal. Frequent applying and removing may wear out the cuffs faster. We have a shoe in testing that will allow for daily applying and removing like a hoof boot.

Q: Can I turn my horse out barefoot and apply the shoes occasionally?

A: Theoretically, you could turn your horse out in a pasture barefoot and then apply the shoes on occasion. We do not recommend daily applying and removing as it will wear the cuffs out more quickly. Please note: If your horse is turned out on rocky terrain, there is a slight possibility the hoof will wear out or "self trim" and impact the alignment of the shoe and cuffs, but it is an unusual case.

Q: Can I use the Mushroom Cuffs with other glue-on EasyShoes?

A: No, the Mushroom Cuffs are designed specifically for the EasyShoe One Glue.

Q: Can I use the Mushroom Cuffs for performance riding?

A: Yes! The snaps will hold secure for riding. If you are concerned about losing a shoe, we recommend reinforcing the Mushroom Cuffs by Super Gluing them to the cuff on the One Glue.
